Document Imaging

Add Image Issue (Fix)

There was an issue caused by an update to Microsoft 365 which prevented workers from being able to Add Image emails. The issue has been fixed and workers will be able to Add Image emails as normal without having to do the workaround of saving the email as a PDF.

Note - the preview will look slightly different for Citrix users. The preview is for users to confirm the content of the email matches the one they selected. Once it gets saved to NFOCUS (File Director database), the document will look just like the original email.

Expert System

Administrative Role Updates in N-FOCUS Not Saved (Fix)

Changes to Administrative Roles made using the Name/Payee/NH Rep tab in Expert System were not being saved/displayed in the Mainframe. This issue has been resolved.
